DUO-FAST

Engineered Solutions for Wood Fastening in the cabinet industry

For more than 70 years, DUO-FAST® engineers have been continually developing state-of-the-art tools to make manufacturing easier and more efficient while making finished cabinets stronger with zero defects. Our ongoing goal is to take the best tools and make them even better.

At the core of the evolution of cabinetry solutions is the ENGINUITY™ cabinet fastening system. ENGINUITY is a complete system of pneumatic, industrial-strength SureShot® power tools, heavy-duty DUO-FAST fasteners and specialized placement guides designed to provide fast, accurate fastener placement. The ENGINUITY system's lightweight Precision Placement Guides eliminate the guesswork of "eyeballing" staple position—delivering the fastener in the precise spot needed to ensure superior bonding. Best of all, ENGINUITY was designed exclusively for cabinet assembly, giving your cabinet making operation a competitive edge as it joins the realm of efficiency and accuracy.

CABINET FASTENING SYSTEM by DUO-FAST®

Of course, no bond is completely secure without DUO-FAST fasteners. DUO-FAST fasteners ensure all bonds are tight and secure. All DUO-FAST fasteners are:

- Crafted of high grade steel made in brite, galvanized, stainless and more to provide the best performance to fit specific applications.
- Optimized to enhance the performance of DUO-FAST tools.
- Available in a variety of leg lengths, crown widths, gauge sizes and point geometries to maximize holding power in a variety of different woods.
- Designed for smooth, easy driving into the toughest of surfaces, without flogging, bending or breaking.

Whatever the application, DUO-FAST makes the right fastener for your production needs.

ITW INDUSTRIAL FASTENING, Inc., a subsidiary of Illinois Tool Works (ITW), is the proud owner and manufacturer of the DUO-FAST®, PASLODE® and JOSEF KIHLEBERG brands. With a proven history in cutting-edge fastener technology for the cabinetry, millwork, truss, flooring/carpeting and furniture markets, ITW is the leader in engineered solutions for wood fastening.
