

Sentinel Film Monitoring System

Orion's patented design precisely measures the film weight applied to each load and displays your Film Cost per each load, the last 5 loads, and graphs the last 30 loads. It also displays the Film Weight per Load, Number of Wrap Revolutions, Load Height, and Weight of remaining Film on the Supply Roll. You may also set minimum/maximum limits for film cost per load, thus receiving an alert if film cost is too low/high.

NEW! Sentinel Film Monitoring System

	FILM WEIGHT	LOAD HEIGHT	REV COUNT	COST (\$)
1ST	0.512	49.5	10	0.59
2ND	0.481	49.5	10	0.55
3RD	0.476	49.5	10	0.55
4TH	0.520	49.5	10	0.60
5TH	0.380	49.5	10	0.44

Keeps Watch Over Your Stretch Film Cost

- Precisely measures film weight
- Calculates film cost per load
- Graphs cost over time
- Be alerted to potential problems
- Available on MA & FA models

orion
powered by Pro Mach Made in the USA

Available on all Orion MA & FA models
