

Pre-Solution Application

The client, a door and cabinet manufacturer, was using sheets of corrugated between doors and cabinets to provide protection during shipment. Unfortunately, the doors and cabinets were getting damaged in transit as a result of products rubbing together and piercing through the corrugated sheets.

The R..V. Evans' Value Added Solution

After performing a Site Needs Analysis and thorough review of the application, R.V. Evans' Sales Specialist tested and determined the appropriate value added solution. **The recommendation:** Honeycomb sheets to protect from rubbing and puncture damage in transit and storage.

Key Benefits of the Honeycomb Sheets

- Thicker and More Dense Protection
- Recyclable / Reusable
- Easy Tear for Convenient Sizing

Measurable Savings Realized

The Honeycomb sheets have proven to be an ideal protective packaging solution for these millwork products. R.V. Evans Company was able to help the client realize a measurable savings by reducing the amount of damage during transit to their doors and cabinets.
