

COHESIVE PACKAGING PRODUCTS

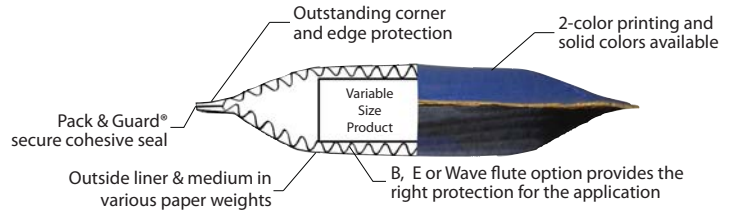

INCREASE PRODUCTIVITY AND PACKAGING EFFICIENCY

COHESIVE

SINGLE FACE CORRUGATED

Padding, Protection & Rigidity!

Cohesive Single Face is an ideal packaging material when cushioning and rigidity are necessary to protect your products during shipping and handling. Cohesive single face is a rigid & padded product that can be made in various weights for customized protection of your goods.

Packaging Options To Meet Your Specific Needs

B, E or Wave Flute varieties

3D package for stability

Stand out with two different colors

Bleach white papers available

1 or 2 color print for branding

Add print to the flutes (outside or inside)

Easy open options

Flood printed custom colors

Combine different materials

COHESIVE

LINERBOARD | PAPER | POLY-PAPER

Rigid, Versatile & Recyclable

Cohesive Linerboard is an extra heavy paper that provides increased rigidity, corner & surface protection versus standard cohesive paper. Cohesive linerboard is available in different basis weights to provide your products the level of protection they require.

Cohesive Paper is an economical and easy to use material that encapsulates a product to provide protection from dust and dirt when cushioning is not necessary.

Cohesive Poly-Paper is a tough, durable, water resistant material uniquely created by Surface Guard. We manufacture this material in a number of composition options to provide your products the aesthetic and performance characteristics they require.

Packaging Options To Meet Your Specific Needs

Weather resistant Poly-Paper

Easy open options

Uncoated edge for easy open

1 or 2 color print for branding

Flood printed & custom colors

Bleach white & specialty grades

Rigid linerboard for edge/corner protection

Combine different materials

Standard pack for quick encapsulating

Please consider the environment and recycle

FILM

Secure, Durable & Weather Resistant!

Cohesive Films are the perfect packaging material when tear, puncture and water resistance are necessary. Surface Guard manufactures a wide range of cohesive films to fit diverse packaging needs.

While clear LDPE is the most common film used when visibility of the contents is important, we also offer Silver/White Co-Ex films for extra security and tamper resistance. Specialty films and even tinted films are available to further differentiate your packaging.

Packaging Options To Meet Your Specific Needs

Standard clear film package

Custom tinted or opaque films

Custom co-extruded colors

Co-extruded silver/white package

Combo package (two material types)

Easy open perforations

Custom 1 or 2 color print

VCI (Volatile Corrosion Inhibitor) film

Strip coated for easy returns

BUBBLE & FOAM PRODUCTS

For Added Flexibility and Cushioning

Pregis/Surface Guard manufactures a complete line of cohesive coated bubble and foam materials for automated and hand packaging applications. These flexible, cushioning and protective materials are available in a wide range of compositions, thicknesses and roll options.

Cohesive Bubble is a superior cushioning material to protect items from damage, vibration and abrasion. Material can be utilized for surface protection, manual packaging or wrapping application. Cohesive bubble can also be utilized on automated packaging equipment to benefit a variety of products by creating fast, lightweight and protective packages.

- Bubble available in: 1/8", 3/16", 5/16", 1/2"
- Bubble available in Clear, Green, Black and Anti-Stat compositions
- Co-Ex, Mono, Colored and Clear Film liners available
- 4 color printing available
- Custom roll widths, lengths and converting options available

Cohesive Foam is a flexible and cushioning material for numerous protective, wrapping and automated packaging applications. Cohesive foam is available in standard polyethylene (PE) or Microfoam® option. Microfoam® is a proprietary polypropylene (PP) foam featuring a high coefficient of friction, lightweight properties and chemically inert structure. This unique material is a lightweight and sustainable alternative to standard PE foam materials.

- Foam available in 1/32", 1/16", 3/32" thicknesses (1/8", 3/16", 1/4", 1/2" available upon request)
- Polyethylene (PE) Foam and Microfoam® available
- Co-Ex, Mono, Colored and Clear Film liners available
- 4 color printing available
- Custom roll widths, lengths and converting options available

Whether you fulfill and ship 500 or 50,000 packages a day, the packaging product and process you use are key components to getting your goods into the hands of your customers, timely and undamaged. With cohesive packaging materials and automated equipment you can not only protect and ship your goods, but also improve productivity and lower your labor and total packaging costs. Achieve 15-35 packages per minute by automating your packaging with cohesive materials from Surface Guard (A Division of Pregis).

The Automated Packaging Advantage

- ✓ Significantly reduce labor costs associated with the packaging process
- ✓ Increase the number of items packaged per hour (up to 2100/hr.)
- ✓ Create efficient packages utilizing the right amount of material
- ✓ Realize potential shipping & postage savings with lightweight packaging
- ✓ Create secure & tamper evident packages
- ✓ Reduce your total per package cost
- ✓ Customized solutions with fast return on investment (ROI)
- ✓ Package a wide range of product types and sizes with automated equipment

Automated Packaging Solutions the Surface Guard Way

Surface Guard's goal is to develop a total partnership with our distributors and end users. We establish a complete automated packaging solution to meet the application's needs and operational requirements. We offer a variety of highly customized packaging systems along with manufacturing the most extensive line of cohesive materials in the industry. Our team will work with your team to identify, justify, design and implement the most effective packaging solution for your or your customer's product mix. Below is just the beginning of what you can expect when you work with Surface Guard.
