

Fully Automatic Self-Locking Tray Forming
Up to 35 trays per minute

Self-locking Tray
The ATL forms self-locking trays.

ATL Automatic Tray Former, Self-Locking

WEXXAR's ATL automatic self-locking tray former offers specialty tray forming for industrial, agricultural, and distribution applications. Designed and built for sustained, heavy-duty applications, the ATL model is highly versatile, reliable and operator friendly. A Human Machine Interface (HMI) touch screen allows operators to monitor and track all ATL functions and provides pictorial, step-by-step instructions on how to resolve tray forming issues. Corrosion resistant construction enables the ATL to withstand the demands of most workplace environments. Options to provide full wash-down protection are also available. State-of-the-art servo motion control forms trays precisely at speeds of up to 35 trays per minute and minimizes machine vibration.

Operator Safety

The Wexxar ATL aids in employee safety with standard interlocked guarding and ergonomic magazine loading.

Color-coded Setup

Color-coded adjustments and instructions provide for convenient setup and quick changeover in 15 to 20 minutes.

Control & Quality Assurance

The well-defined process of the ATL means a clean fool-proof forming of various self-lock trays. The state-of-the-art control panel makes for easy monitoring of all functions.

ATL Tray Former

ATL Fully Automatic Tray Former - Self Locking

ATL Features

The ATL forms a wide range of self-locking trays.

- Omron HMI touch screen is standard. The graphic interface monitors and tracks ATL operations and alarms with pictorial, step-by-step instructions.
- Precision servo drive for fast, accurate tray forming up to 35 cpm
- “Easy Load” self priming magazine loader (optional)
- 15 minute “Quick Adjust” size changeover (optional)
- Corrosion resistant construction
- All electrical components are UL/ULC recognized, name-brand quality and meet NEC, UL, and NFPA code standards

Complete Solution

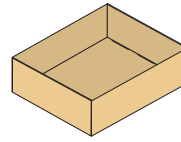

Oversize / Undersize Options Available
The oversize / undersize model is available to accommodate larger or smaller case requirements. Submit to factory for options.

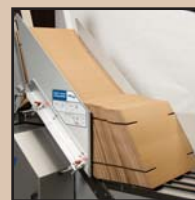

Washdown ATL
Machine options to provide wash down protection are available.

How the ATL Works

Self-locking Tray
The ATL forms self-lock trays.

1 Easy Loading
Toothed conveyor transports tray blanks and automatically loads them into the in-feed hopper on-the-fly with minimal effort.

2 Operator-Friendly Control Panel
The enhanced HMI touch screen makes monitoring and tracking all ATL functions easier than ever and provides pictorial, step-by-step instructions on how to resolve tray forming issues.

3 Precision Forming
The ATL's servo motor varies speed and adapts itself to the tray being formed, easily handling more complicated self-lock tray designs.

ATL Specifications

Tray Size Range	Length	Width	Height
Minimum	11"	8"	2"
Maximum	24"	20 1/2"	5"
Machine Speed: Up to 35 trays per minute. Oversize model available.			
* Specifications are subject to change without notice, depending on tray style.
