

Reduce Footprint and Increase Efficiency with the AirPouch® Compact Overhead Hopper and Stand

Designed to work with the AirPouch® Express 3™ Void-fill System, the Compact Overhead is an all-in-one structure that saves valuable square footage. It is ideal for high-volume operations, and feeds up to two packing stations simultaneously. The AirPouch Compact Overhead increases productivity by using a sensor that triggers the Express 3 to cycle whenever the hopper is low, ensuring a constant supply of pillows.

Features Include

- Saves floor space
- Overhead delivery of pillows
- Feeds up to two pack stations
- Sensor for automatic pillow refill
