Using AIRplus® CX Film products promotes sustainability because they're #2 curbside recyclable and made using our Zero Waste Technology (ZWT). ZWT reintroduces 100% of our reclaimable material back into the process during manufacturing to support source reduction.

Plus, our state-of-the-art co-extrusion process creates a durable, triple-layer film with a non-slip surface, reinforced strength and special heat-sealing properties for more reliable protection.
