DUO-FAST

Engineered Solutions for Wood Fastening in the furniture industry

Though only a small part of your furniture production operation, your company's entire reputation can hinge on the quality of its fastening system and fasteners. The quality of your fasteners and how strong they bond will ensure your products can withstand the test of time where it matters most—in the field.

That is why DUO-FAST® is continually creating better tools and fasteners to meet your ever-demanding manufacturing needs. Our DUO-FAST tools can handle even the most demanding manufacturing operation. Durable and reliable, these powerful tools are specifically designed for heavy-duty, repetitive industrial use.

For more than 70 years, DUO-FAST engineers have continually developed state-of-the-art systems to make furniture manufacturing easier and more efficient.

Perfect for framing as well as upholstery, DUO-FAST tools and fasteners can ensure your products are reliable in the field.

Of course, no bond is completely secure without DUO-FAST fasteners. DUO-FAST fasteners ensure all bonds are tight and secure. All DUO-FAST fasteners are:

- Crafted of high grade steel made in brite, galvanized, stainless and more to provide the best performance to fit specific applications.
- Optimized to enhance the performance of DUO-FAST tools.
- Available in a variety of leg lengths, crown widths, gauge sizes and point geometries to maximize holding power in a variety of different woods.
- Designed for smooth, easy driving into the toughest of surfaces, without flogging, bending or breaking.

Whatever the application, DUO-FAST makes the right fastener for your production needs.

ITW INDUSTRIAL FASTENING, Inc., a subsidiary of Illinois Tool Works (ITW), is the proud owner and manufacturer of the DUO-FAST®, PASLODE® and JOSEF KIHLEBERG brands. With a proven history in cutting-edge fastener technology for the cabinetry, millwork, truss, flooring/carpeting and furniture markets, ITW is the leader in engineered solutions for wood fastening.
