

Pre-Solution Application

The client, a manufacturer of high temperature masonry bricks, has a dedicated staging area in their facility to hand load bricks onto pallets for shipment. They had to dedicate the use of a fork truck to elevate the pallets up to the proper loading height.

The R..V. Evans' Value Added Solution

After performing a Site Needs Analysis and thorough review of the application, R.V. Evans' Packaging Sales Specialist determined the appropriate value added solution. **The recommendation:** The Presto XL36-60 Scissor Lift.

Key Benefits of the Presto Scissor Lift Solution

- Hand control pendant or foot control options
- Heavy-duty hydraulic cylinders with chrome plated rams
- Rugged 3/4" steel plate scissor legs
- Lifetime lubricated bearing on all rollers and pivot points

Measurable Savings Realized

The lift table frees up the forklift, is much safer, and provides improved ergonomics making it easier for the users to adjust the pallets up and down to the proper loading height.
