

Surface Guard manufactures a complete line of surface protection films designed to protect critical surfaces from marring, scratches and abrasions. Surface Guard® Protective Films are coated with custom formulated, pressure sensitive, clean peel adhesives. They are designed to adhere to and protect your critical surfaces during fabrication, assembly, shipping, storage or whatever the process may be. Surface Guard has the knowledge, experience, capability and Research & Development Team to create the right Surface Guard® for you.

### Coating Capabilities

- Multiple coating lines with up to 80" finished width
- Strip/lane coating to control location adhesion
- Uncoated edge options for easy removal
- 2 color printing available

### Film

#### Types

- Polyethylene: Low, Medium, High and Linear Low Density
- Co-Extruded Films: Black/White and Silver/White
- UV Protective Films
- Polypropylene
- Blended Films
- Low Gel Films
- Custom films available upon request

#### Colors

- Clear (Transparent or Translucent)
- Colored/Tinted Films (i.e. Blue, Yellow, Green)
- White (Opaque)
- Black/White, Silver/White or Custom Co-Extruded Film
- Custom colors available upon request

### Converting Capabilities

- Roll Lengths: 50' up to 15,000'
- Roll Slitting: 1" minimum up to 80" maximum
- Roll Perforating: 3" minimum up to 120" maximum
- Perforation Direction: Vertical or Horizontal
- Custom Slitting: Regular Wound or Reverse Wound

### Adhesive Specifications

- Environmentally friendly water based acrylic adhesive systems
- Adhesive Peel Range: 0.08oz/inch to 35oz/inch
- Research & Development customizes adhesive systems to your exact surface. Submit your surface to our lab for evaluation.

### Quality

*The quality of Surface Guard® products begins with our leadership and employees and is sustained through the ISO 9001:2008 quality management program that is implemented every day. Our work is documented, measured & evaluated at every level so we know where to improve. Knowing where to improve helps us continuously improve.*

### Lead Times

*Looking for speed? Standard lead times are as short as 9 days. Our on time delivery rate is over 99%!*

*Please call for answers, samples or quotes. Stock samples will be sent same day and quotes within 24 hours.*

Surface Guard's Research and Development Team has custom formulated thousands of adhesive systems for surfaces as familiar as painted metal to unique objects that have a combination of metal, plastic and glass. Send in your substrate and they will evaluate your specific surface and find the surface protection solution that will protect, endure & remove easily and cleanly when the time comes. Below, review the list of typical markets and applications where Surface Guard® is used every day. Don't think your application fits? Contact us and see how Surface Guard can help!

**Metals**

- Painted Metals
- Anodized & Stainless Steel
- Decorative & Architectural
- Roll Formed, Extruded, Etc.

**Appliances**

- Stainless Steel
- Painted Metals
- Plastic Handles/Displays
- Injection Molded Parts

**Automotive**

- Appliques & Interiors
- Floor and Seats
- Tier 1 & 2 Suppliers
- Aftermarket Parts

**Transportation**

- RV & Trailer
- Marine
- Aerospace
- Recreation

**Laminates/Solid Surface**

- Low Pressure/ High Pressure
- Home/Office Furniture
- Counter Tops
- Granite, Quartz, Marble, Etc.

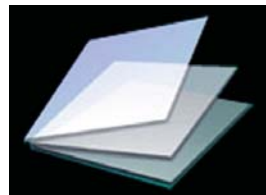

**Carpet/ Flooring**

- Office Carpeting
- Residential Carpeting
- Hardwood Flooring
- Tile & Vinyl

**Optical/Display**

- Prism or Collimating Films
- Polarizer & Reflector Films
- Cell Phone & PDA
- TV & Computer Screens

**Plastic/Polycarbonate**

- Injection Molded Parts
- Plastic Sheet & Films
- Signage & Display
- Optical Films
- Thermoformed Parts

**Furniture**

- Home/Office Furniture
- Outdoor Furniture
- Cabinetry/Fine Carpentry
- High Pressure Laminates

**Construction**

- Carpet & Flooring
- Windows & Doors
- Skylights & Light Panels
- Asbestos & Paint Containment
- Bath & Shower
