

WORLDWIDE

DISTRIBUTION

Quality manufacturers have trusted Daubert Cromwell products for nearly 60 years to protect their valuable metal parts against corrosion and tarnish.

Today, as companies continue to seek new ways to reduce corrosion preventive costs yet maintain the quality of their valuable metal parts, they rely on Daubert Cromwell's ingenuity to provide them with the most efficient, comprehensive, & innovative VCI packaging solutions.

Daubert Cromwell operates from a state-of-the-art manufacturing facility and corporate complex located just outside of Chicago, in south suburban Alsip, IL. This operations center serves as the worldwide headquarters for manufacturing, shipping, sales/marketing management, customer service support, as well as the technical functions of the company. Regional sales offices in the U.S., together with a global marketing network of selling agents and authorized distributors, are all part of the Daubert Cromwell strategic growth initiative.

Its experienced technical staff, working with a vast library of world-class film and paper chemistries,

offers customers a rich reservoir of engineering talent to further develop highest quality packaging films, papers, liquids and devices for industry. Whether a customer needs to protect parts, components and assemblies for days or for years, Daubert Cromwell has the capacity, formulations and the right products to meet that need.

Add to this Daubert Cromwell's expanded customer service support, its on-time delivery systems, and worldwide presence, and you have a new breakthrough company capable of surpassing industry standards for value and quality in protective packaging and distribution.

INNOVATIVE SOLUTIONS

Daubert Cromwell... the new breakthrough force in VCI protective packaging worldwide.

The core competency of Daubert Cromwell is to provide VCI protection for metals exposed to corrosive environments.

For years, Daubert Cromwell's primary product lines such as Nox-Rust®, Vapor Wrapped®, Protek Wrap®, Ferro-Pak®, Ferro-Film®, MPI and Uniwrap® have provided superior protection for both ferrous and non-ferrous metals. Silver and specialty metals used in electronics, jewelry, automotive and other industries have long benefitted from the anti-tarnish protection of Silver Saver® and now new Silver Guard™ film and bags.

For the military, Daubert Cromwell's protective packaging meets the strictest federal regulations to insure that supplies and equipment moving across the world arrive corrosion-free and ready for immediate use on the battlefield. In pipeline applications, where flexibility, weather extremes, moisture, acidity or galvanic attack are vital concerns, Daubert Cromwell offers proven products that provide multi-level protection. For automotive and

aerospace industries, for heavy equipment, bearings and precision metal machining, and all products transported or stored in harsh environments, Daubert Cromwell has the most effective corrosion inhibitor packaging available anywhere.

No matter what the corrosive element, whether in the enclosed space of electronics, telecommunications, jewelry, heirlooms, musical instruments, or computer components, Daubert Cromwell offers resilient methods of protection, consistent with our customer's competitive needs.

Consistent quality... exemplary service...

innovative solutions, these are the strengths that make the New Daubert Cromwell industry's first choice for protective packaging.
