

DAUBERT CROMWELL

The Leading Name in Corrosion Prevention®

The Most Complete VCI Product Line from the Brands You Trust

VCI Papers, Bags and Wraps

Daubert Cromwell VCI papers provide the highest quality, most reliable, and effective corrosion preventive packaging for industry. A selection of formulations, constructions, and laminations are available to assure the right product for each application.

VCI Films

Daubert Cromwell VCI films combine the most advanced corrosion prevention technology with durability and convenience of polyethylene packaging. Clear Pak®, Ferro-Film®, and Metal Guard® are just a few of the proven brand name choices to protect ferrous and non-ferrous metals.

Versil-Pak®

Versil-Pak is a flexible, greaseproof, waterproof barrier wrap for protecting underground piping. Versil-Pak works as a total barrier against high acidity, bacterial attack or galvanic attack, which contribute to pipeline corrosion. It is an extremely conformable, easy-to-use wrap that is highly resistant to moisture.

Anti-Tarnish Packaging

Noble metals are especially vulnerable to tarnish. Silver Saver® and Silver-Guard™ papers and films effectively protect delicate electronics, wire and components without staining, discoloration, or affecting conductivity. It is non-toxic and safe for industrial and consumer uses. New Silver-Guard film combines that same anti-tarnish chemistry with the moisture barrier benefits of polyethylene film. Silver-Guard zipper bags are ideal for storing flatware, coins, jewelry, and silver décor items in the home.

Daubert VCI, Inc., and Cromwell-Phoenix, Inc., have been pioneers of volatile corrosion inhibitor (VCI) technology since the 1940's. Both developed unique brands of VCI packaging papers, films, liquids and devices that have become recognized worldwide for unsurpassed quality and superior protection. The synergy created now by merging into Daubert Cromwell offers new opportunities to expand manufacturing, technology and service capabilities. Daubert Cromwell is committed to meet the dynamic packaging challenges of today's automotive, military, heavy equipment, electronics, primary steel and precision parts markets where corrosion prevention is critical.

FERROUS & MULTI-METALS

VCI PAPERS

Daubert Cromwell manufactures a wide range of VCI papers to accommodate specific packaging requirements. Whether a customer needs to protect parts for days or years, Daubert Cromwell has a product to meet that need. Nox-Rust® Protek Wrap®, Ferro-Pak®, Ferro-Galv®, MPI and Uniwrap® are among the brands manufacturers trust to provide superior protection for ferrous and non-ferrous metals. When the packaging must meet stringent military requirements, customers turn to the array of Daubert Cromwell papers on the military's Qualified Product List for proven, reliable, highest quality corrosion protection.

Silver Saver® and Silver-Guard™ are unique in the packaging industry as the only anti-tarnish papers for protecting sensitive electronics, jewelry, coins, and noble metals.

All Daubert Cromwell papers can be converted into sheets, bags, and wraps for individual parts; shrouds, covers and liners for large pieces or stacks of parts. The protected metals stay clean, dry, and ready to use during export, storage and in-process manufacturing.

VCI FILMS

Clear Pak®, Ferro-Film® and Metal-Guard® polyethylene films meet new demands for proven corrosion protection. Through volatilization and contact, the VCI chemicals integrally blended into the film protect metal parts against the corrosive effects of moisture, salt, and other contaminants. The inherent properties of film, combined with proprietary Daubert Cromwell corrosion inhibitor chemistry, result in products that are heat sealable, economical, and highly water resistant.

Daubert Cromwell offers films that are designed specifically for ferrous metals, — including steel and cast iron — non-ferrous metals, plus nitrite-free formulations. All are transparent, strong, and tear-resistant, making them ideal for large and roughly handled packages. Films are available as sheeting, flat bags, gusseted bags, zipper bags, bonnets, and custom shapes.

Stretch film

VCI stretch film offers the handling ease of polyethylene with the corrosion protection of VCI chemistry.

Silver-Guard® Film

Packaging and storing precious silver in see-through reclosable Silver-Guard bags is the convenient, effective way to prevent tarnish.

SPECIALTY VCI PACKAGING

Versil-Pak®

Versil-Pak is a flexible, greaseproof, waterproof barrier wrap for protecting underground piping in corrosive or severe environments. It works as a total barrier against high moisture, acidity, bacterial attack or galvanic attack, which contribute to pipeline corrosion. Versil-Pak is made with a carefully selected fabric saturated and coated with a high adhesion adhesive wax, as well as a high barrier plastic film. It is designed to combine high tensile strength, good moldability, excellent dead-fold, and high dielectric strength.

Daubrite® Emitters

Daubrite foam and disk emitters prevent corrosion in enclosed spaces — electrical boxes, control panels, telecommunications equipment, and more. When the corrosion-inhibiting vapors are released, they form an invisible barrier of VCI protection. Emitters are safe, easy to install, and last for years.

Nox-Rust® Liquids and Powders

More than 20 different types of Nox-Rust liquids and powders protect metals in lay-up and preservation applications, during and after hydrostatic testing and in all types of indoor/outdoor storage conditions.

NON-FERROUS & SPECIALTY METALS

Corrosion Preventive Packaging for Industry

In 2004, Daubert VCI, Inc., and Cromwell-Phoenix, Inc., the two most respected manufacturers of corrosion inhibitor technology, successfully merged to become Daubert Cromwell. This merger of manufacturing and technological expertise, combined with the acknowledged best customer service in the industry, sets the new standard in packaging solutions for customers in automotive, military, heavy equipment, electronics, primary steel and other markets where corrosion prevention is critical.

Daubert Cromwell operates from a state-of-the-art manufacturing center conveniently located in suburban Chicago. All manufacturing and shipping functions, plus sales management, customer service, technical and financial offices are headquartered in Alsip, IL. Regional sales managers are strategically located in geographic territories throughout the U.S. In addition, the company has a global sales team coordinating customer requirements in Mexico, China, Southeast Asia, Japan, India, Europe, Australia, South America, and wherever Daubert Cromwell products are needed.

Quality manufacturers have trusted Daubert Cromwell products for more than 60 years to protect their valuable metal parts against corrosion. Today, as companies seek ways to reduce costs yet maintain quality in all stages of manufacture, storage and shipment, Daubert Cromwell offers innovative solutions to corrosion problems. Through proven quality and years of exemplary service, the company has earned its reputation as "The leading name in corrosion prevention®."
