STOROpack

AIRplus® Mini — Reaching Beyond Its Excellent Reputation

AIRplus® Mini is a very quiet and compact machine that weighs only 20 lbs. It features a built-in calibrated heat-sealing unit that provides an automatic, consistent seal of air bags. The AIRplus® Mini's small size combined with easy loading and **now doubled speed** make it an extremely productive addition to any packaging environment.

Storopack's AIRPlus® Mini has always had a reputation as a reliable, easy-to-use machine that improves packaging production. Now we've taken our technology one step further to give you double the speed for even faster production from the same reliable, convenient system.

- Portable and compact for easy integration into single or multiple packing stations
- Proven, reliable operation
- Easy to load and operate
- Stand or table top operation
- Adjust air fill for specific packing requirements
- Completely programmable
- Runs any size AIRplus® Square Bags or AIRplus® Cushion Film
